POTENTIAL INCOME

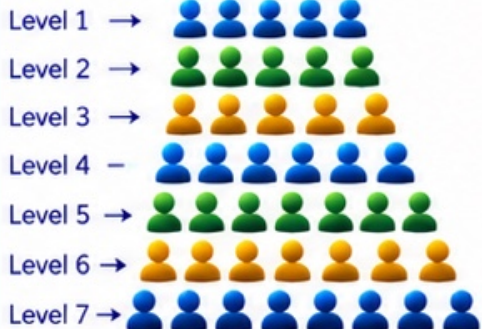

UNILEVEL BONUS SIMULATION

Let's look at a simple simulation based on the same structure as the previous slide.
This example shows the potential Unilevel Bonus from your network (total account).

NETWORK EXAMPLE

You sponsor 5 accounts
and each account also
sponsors 5 accounts,
and so on, up to 7 levels.

YOU

TOTAL ACCOUNTS
(LEVEL 1 - 7)

109,375

LEVEL	TOTAL ACCOUNTS	BONUS (%)	INCOME (USDT) (Example: USDT 100 per account)
Level 1	5	3%	15.00
Level 2	25	2%	50.00
Level 3	125	1%	125.00
Level 4	625	1%	625.00
Level 5	3,125	1%	3,125.00
Level 6	15,625	1%	15,625.00
Level 7	78,125	1%	78,125.00
TOTAL	109,375	10%	97,665.00

This is a simulation example based on total account and a package value of USDT 100 per account. The actual income will depend on the number of active accounts and the package value in your network.
